The preliminary amendment received 2/17/05 and the priority documents have been entered and claims 12-13 are considered here. Please inform the examiner of any related cases, abandoned, pending or allowed.

Applicant's election with traverse of Group I, claims 12-13, in the reply filed on 12/26/07 is acknowledged. The traversal is on the ground(s) that no lack of unity was found for the PCT application. This is not found persuasive because this is a National Stage application which follows different rules.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Rodriguez.

Art Unit: 1657

Rodriguez (WO 03/077950 A1) entitled "Enhanced Feeding and Growth Rates of Aquatic Animals Fed an Astaxanthin Product Derived From Marigold Extract" teaches on page 2 first full paragraph, adding an astaxanthin product obtained from a marigold extract to the feed of an animal. On page 7 first paragraph the conversion of zeaxanthin to astaxanthin is described. On page 8 first full paragraph, we have demonstrated a method of obtaining an astaxanthin product by semi-synthesis from lutein which was derived from marigold extract.

All the features of the claims are taught by Rodriguez for the same function as claimed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13 "before the combination" lacks definite antecedent basis. "Into a form which makes possible combination with animal feedstuffs" is not understood in context.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sas (5,876,782 and 6,221,417) teach converting xanthophylls.

Schloemer (6,372,946) teaches preparing astaxanthin.

Hauptmann (7,033,622) teaches marigold extracts.

Steiger (2006/0053513) teaches producing astaxanthin.

Sauer (2006/0162020) teaches producing astaxanthin.
